

Ravenscroft Global Solutions Fund

Investing for a better world

Ravenscroft Global Solutions Fund

Long-term global trends such as changing demographics, accelerating innovation and increasing wealth are shaping the world around us. As these trends evolve, the demand grows for energy, water, healthcare, food and materials. This creates challenges and opportunities.

We recognise that the coming decades will see significant changes. As a society we will need to alter the way we build cities, generate energy, travel, grow food and clothe ourselves. The result is an exciting investment opportunity, Ravenscroft Global Solutions Fund, which will invest in companies that are working towards solving the most pressing challenges we face today.

Overview

A focused portfolio investing in equity funds, the Global Solutions Fund invests in companies providing goods and services dedicated to tackling the challenges the world faces today, in particular:

- Environmental solutions (such as recycling)
- Basic needs (access to clean water and healthcare, for example)
- Energy transition (the move to clean energy)
- Emerging equality (improving lives outside of the developed world)
- Resource scarcity (doing more with less)

The Fund is run by the Ravenscroft multi-manager team who collectively have decades of thematic investment experience. It is our belief that the companies this Fund invests in are well-positioned to help solve the critical challenges facing our world.
